

Quality Policy

At CTP Team we are committed to deliver transformative innovation to our stakeholder worldwide. We provide high quality services and solutions to minimize the impact of industrial sector on environment and improve the business in global industry.

Quality Management System (QMS) means “continuous improvement”, it starts with the involvement of key people to all levels and identifies clear and simple rules dropped on the daily operations, shares key objectives for achieving smooth working processes to support the internal value-chain and meet the expectations of our stakeholders.

Quality principles

Commitment

Engage key people to identify clear and simple rules dropped on the daily operations, contributes to the continuous improvement of the business

Value Chain

Promote smooth working process and support the internal value-chain and supplier relationship to meet the expectations of our stakeholders

Improvement

Measure the business performance and improve the Quality Management System providing tools to drive and support the process

Risks & Opportunity

Mitigate the risks and monitor the opportunities to support and promote the company's business strategy and core values

These principles are incorporated in our quality system and business processes.
